

# STOP PLAYING GUESSING GAMES

Elevate Your Job Search Effectiveness

## MORE INTEREST FROM BETTER COMPANIES

The way you write your resume will determine what types of jobs you are considered for, what types of people you'll work with and the quality of the companies that approach you

Intelligent Job Seeker is a career enhancement service designed by the recruiting experts at KAS Placement.

For less cost than a professional resume service, we are able to empower job seekers with industry and experience level specific resume guidance not available anywhere else.

Instead of writing your resume, we show you how others in your target industry position themselves, allowing you to change your resume when you want, how you want, without additional charges.

Utilize the knowledge to strike a balance between amount of content, relevancy of content, resume length, industry terminology and layout.

Also, an estimation of each profile's salary will allow you to go into contract negotiations more informed and confident.

Whether you are switching industries, changing careers or finding a job after graduation, IJS will empower you with the competitive intelligence necessary to get there.
